AGA INSTITUTE GUIDELINES FOR
Colorectal Cancer Surveillance
CLINICAL DECISION SUPPORT TOOL

No polyps or hyperplastic polyps in rectum/sigmoid
Repeat in 10 years

Neoplasia found

SERRATED POLYPS/ LESIONS

Serrated polyposis
Repeat in one year

≥ 10 mm or with dysplasia or traditional serrated adenoma
Repeat in three years

< 10 mm in proximal colon and without dysplasia
Repeat in five years

HIGH-RISK ADENOMAS

> 10 adenomas
Repeat in less than three years

Three to 10 adenomas
Repeat in three years

Villous adenoma(s) or tubular adenoma(s)
≥ 10 mm
Repeat in three years

Adenoma(s) with high-grade dysplasia
Repeat in three years

LOW-RISK ADENOMAS

One to two tubular adenomas < 10 mm
Repeat in five to 10 years

These recommended intervals assume a complete exam to cecum, adequate bowel prep and complete removal of polyps at the baseline exam.
